

Environmental policy #148B6.doc

Hallen Engineering Ltd specialise in producing tubular items in accordance with customer specifications and drawings

The company recognises its actual and potential impact on the environment and is committed to effective environmental management.

The company is committed to:

- prevent pollution and nuisance
- comply with relevant environmental legislation and other requirements
- reduce the production of waste, encouraging wherever possible its recycling and manage the effective disposal of waste
- minimise the actual and potential environmental impacts associated with our activities
- evaluate environmental impacts when considering new plant, equipment or processes
- continual improvement through setting objectives and targets to address our significant aspects;
- encourage company-wide involvement by providing training to all staff on environmental issues and by providing opportunities for staff to contribute to environmental improvements

Hallen Engineering Ltd will achieve this through appropriate actions, including working pro-actively with employees, customers, contractors and other interested parties.

All elements of the environmental management system will be audited and reviewed at least annually.
